LEADING POWER SUPPLY SERVICE

Since 1987, JP Tech has provided unmatched service and support for the metal finishing industry. Our technicians have over 60,000+ hours of combined experience with on-site repairs, line upgrades, equipment installation, cabling, process troubleshooting, training, and consulting. We specialize in keeping your lines running!

Technicians from our facility are trained by more manufacturers than any other company in North America, and have the authority to perform OEM-level warranty service.

Knowledge and versatility lets us work on a case-by-case basis with nearly any power supply. We can help lead your maintenance team, quality team, and production personnel to success no matter the size of the challenge.

Statistical Analysis and specialized tools and testing methods provide an in-depth look at the integrity of individual components as well as the complete system. Quickly identifying potential problems allows us to develop permanent solutions and save you valuable downtime! We will endeavor to answer why a problem developed to find a permanent solution. Reliability is our focus.
UNMATCHED EXPERIENCE

Knowledgeable repair goes beyond simply fixing something that’s broken. Our technicians use statistical analysis and specialized testing methods to not only determine where problems have occurred, but where they may occur in the future.

Experienced technicians are able to knowledgably assess the quality of individual components and predict potential failures, with the aim of minimizing downtime and maximizing efficiency.

COMPREHENSIVE SERVICE

Preventive maintenance and on site service ensure equipment is tested and certified, maintaining optimum operation at all times.

Service agreements offer flexibility and peace of mind by utilizing predictive maintenance measures.

Comprehensive services encompass new and rental rectifiers, spare parts, cabling, bussing, board repairs, equipment updates, rebuilds, and a variety of our own metering and pumps to streamline your processes.
