Service agreements give you the most comprehensive coverage possible. We combine our extensive knowledge of rectifier repair and maintenance, process improvement, six sigma failure analysis, and OEM upgrade and parts substitution, to provide an unbeatable level of service. We work and train with all major OEMs to provide one comprehensive service solution.

Service agreement customers benefit from:

- Prioritized service. Usually we are on site within 24 hours or less of breakdown.
- No cost for service and travel within our local area on contracted equipment.
- 4 Preventive Maintenance visits per year with whole system ISO certification.
- 10% discount on all parts drawn from our inventory
- Help maintaining your inventory for all maintenance technicians.
- Flexible payment schedules.

JP Tech will minimize downtime on your line and take care of all your rectifier needs. Our diverse knowledge, preventive mindset, and desire for reliability has earned us a reputation for quality and effective solutions!
**JP TECH IS ON YOUR TEAM**

**Align** our technicians with your company goals. With a service agreement you make money when your machines are running, and so do we. If there is a failure we all lose. This puts us in a position to find every way we can to increase reliability. It’s in our best interest to keep your costs low.

**We prefer to enjoy success with you when you are running!**

Stop worrying about how much you’ll be spending the next time your line goes down. Keep it from going down in the first place. Fixed service rates eliminate surprises.

**Cost** of service agreements is based on pre-established yearly rates, so you don’t have to worry about ballooning costs or unexpected repairs. From the moment you call JP Tech, we are on the hook! If you break down, it’s important for us to get you running again as soon as possible. Reliability becomes our mission.

**Knowledgeable** and experienced service technicians usually resolve major issues within 24 hours.

**Custom** tailored to every unique situation from one to hundreds of rectifiers, JP Tech is the solution.
